HANDWRITING (GRAPHOLOGY) ANALYSIS REPORT OF SAILESH KANJILAL:

The first impression is the writer is emotionally repressed because one of his parents is to be very strict in his childhood that what affected him. He is a converted extrovert, so though he is socially active but not open in terms of emotional expressions. He rarely expresses his actual feelings directly rather most of the time he deposited those. He is mentally stressed because of past and present social issues.

Presently he is working to come out of those past stressed issues but actually not finding any way out as he lacks flexibility. He moves with an one track thought process and maintain a routine bound approach, because of this, in any way suddenly a routine gets changed its become difficult for him to adjust on immediate basis. He does have a strong opinion difference with his father figure.

The writer is Lonely by nature and unable to decide whom to believe and how much to believe and also suffering from low self esteem with a feeling of broken self image. He expresses himself to the world as very optimistic but actually not, rather too much defensive with a fear his image may get hurt. This self conscious attitude is resisting the writer to express self, openly and suffering from sympathy crisis.

In terms of any sort of relationships he least bother that who stays back with him or not in contrary he is not a solo living guy always in need of a partner and relations. He needs to take care of his planning quality where he is too rigid and fixed to a single or particular thought. This personality trait is not going to help him in any square of life. He is able to take risk standing on a solid platform, if he has been asked to start from zero I am sorry he can't. With a support he is an excellent executer otherwise?? He is a person who can keep secrets as a secret. He is not a shallow mentality person but rarely work on self actualization. Confusion in terms of taking decisions is prevailing.

The writer is short tempered and unable to accept criticism. He is intelligent in terms of business and other social activities but not intellectually intelligent i.e. specific application of intelligence. The writer poses to prove himself as a very gentle person but in reality it is true by 50%.

Need to be more flexible to develop life skills to adjust with varied conditions of life.

Physically he is prone to cold and throat congestions. He must take proper care in the abdominal area, subconscious expression of critical issues is there physical expression of the same will show up at any time.

Wish you a healthy and happy life.
